

Commissioners,

We are having a code enforcement issue with a tiny house in the back yard of a residence in Satellite Beach. While this appears to be a clear violation of an improper living arrangement in a neighborhood of single family homes, the county currently has no codes addressing these homes as they are a relatively new product. To clarify our codes, I would like the Commissioners to task the Planning and Development Department to investigate this issue and if appropriate bring back to the board and amendment to our codes.
