Subject:

Policy Prohibiting Elected Officials' Names or District Designation on Specified Signs and Equipment

Fiscal Impact:

Potential savings in reducing required size of signs

Dept/Office:

District 3

Requested Action:

Adopt Attached Policy

Summary Explanation and Background:

It has become a long-standing practice to include Commissioners' names on certain signs relating to construction projects. This practice has multiple negative impacts.

First, it implies that such projects are that of an individual commissioner. In fact, all projects are driven by policy decisions of the full Board. The implications of territorialism harms the County as a whole, insofar as the funds are (or are at least perceived as) being distributed based on politics rather than facts of where funding is most needed.

Such signs also create confusion as to how such projects are funded. Many projects are funded using general revenue, while others are funded through taxing districts that are not identical to commission districts. As such, residents and businesses outside of a commission district are usually paying for such projects.

The attached policy would prohibit such markings on signs and equipment. Markings such as the County logo as well as the cost of a project remain permitted.

This policy would not apply to signs already created.
