L3Harris Technologies is the Trusted Disruptor for the global aerospace and defense industry. With customers' mission-critical needs always in mind, our 46,000 employees deliver end-to-end technology solutions connecting the space, air, land, sea and cyber domains. L3Harris Technologies operates more than 300 locations in over 30 countries globally, is the largest aerospace and defense company in Florida and the state's eighth largest business.

L3Harris Technologies has three mission-aligned segments. Integrated Mission Systems is a leading technology integrator to U.S. and international militaries for complex Intelligence, Surveillance and Reconnaissance (ISR), airborne and maritime platforms and a provider of advanced avionics and training solutions for commercial markets. This segment is headquartered in Palm Bay, Florida. Space and Airborne Systems provides mission solutions and networked systems for space and airborne domains with defense, intelligence and commercial applications. This segment is also headquartered in Palm Bay, Florida. The Communications Systems segment provides secure ground and airborne communications and network systems for the U.S. military, international forces and commercial customers, and is headquartered in Rochester, New York.

As noted, two of L3Harris Technologies three segments are headquartered in Palm Bay, Florida, where they have been operating for 45 years. The company continues to grow its footprint in Florida with recent acquisitions. L3Harris currently employs approximately 8,400 individuals in Florida at over 25 locations with approximately 4,000 of those employees in engineering and scientist roles. The current average annual wage for L3Harris' Florida employees is \$107,000.

The company is considering expanding its presence with two separate projects, code named Project LEO and Project SAMT. L3Harris is considering several locations for these projects in Arizona, Colorado, Indiana, North Carolina and Texas, as well as expanding its current campus in Palm Bay, Florida.

Project LEO will be a state-of-the-art production facility for building and testing space hardware for commercial and government customers, including payloads, unfurlable space antennas, low earth orbit space vehicles, and space vehicle constellations. Project LEO requires construction of an approximate 93,000 square foot new facility with investment of approximately \$70M in building construction costs plus an additional \$13.1M in manufacturing equipment. Additionally, Project LEO would create 101 net new dedicated to this project over the course of several years. The average annual wage of these to be created positions for Project LEO is in excess of \$104,000.

Project SAMT will be a state-of-the-art facility supporting unique, advanced manufacturing technologies allowing opportunities for market expansion into other advanced mission applications. This unique asset will allow L3Harris to claim a greater percentage of program revenue and position the company as a prime solution for advanced packaging efforts. Project SAMT requires construction of an approximate 105,000 square foot

new facility with an investment of \$110M, with additional investments of \$80M for manufacturing equipment and \$11M in business personal property. Project SAMT would create an additional 100 net new jobs dedicated to the project over the course of several years. The average annual wage of the Project SAMT positions to be created is over \$110,000.

L3Harris appreciates the opportunity to apply for the Ad Valorem Tax Abatement ("AVT") program with the City of Palm Bay and Brevard County, Florida. The AVT program would competitively position Palm Bay, Florida, as the location of choice for Projects LEO and SAMT.

Respectfully,

RE: Ad Valorem Tax ("AVT") Abatement Application for L3Harris Technologies, Inc. ("L3Harris" or the "Company"), the "Application" (Project LEO and Project SAMT)

Dear Mr. Abbate:

Thank you for the opportunity for L3Harris to apply for the AVT program. As required for the Application, L3Harris is to submit a pass-through letter from its developer noting the property tax savings will be passed through to L3Harris. At this time, the Company is unable to submit a signed pass-through letter as L3Harris has not yet signed a lease with its selected developer to construct the new building and the developer is unable to sign a document that financially commits it to offer property tax savings to L3Harris until the lease is agreed upon. Included with the Application is a copy of the draft pass-through letter for each project. The Company will plan to submit the signed pass-through letters after full lease execution.

Sincerely,
