Subject:

Permission to Reject All Bids Received in Response to Bid #B-6-23-17 Landfill Compactor and #B-6-23-18 Track Type Dozer with Waste Handler Package

Fiscal Impact:

Dozer - \$966,487.00

Compactor - \$1,124,315.00

Dept/Office:

Solid Waste Management Department

Requested Action:

It is requested that the Board of County Commissioners authorize Purchasing Services to reject all bids received in response to Bid #B-6-23-17 Landfill Compactor and #B-6-23-18 Track Type Dozer with Waste Handler Package.

Summary Explanation and Background:

On September 20, 2022 the Board approved the Fiscal Year 2022-2023 budget for the Solid Waste Management Department, including a summary of Capital Outlay for Equipment Renewal and Replacement. In November 2022 Invitations to Bid were advertised for both a Landfill Compactor and a Track Type Dozer with Waste Handler Package. On December 2, 2022 bids for both pieces of equipment were received and reviewed. The lowest qualified and responsive bid for each piece of equipment was higher than the budgeted amount, with the compactor bid at \$1,438,026.00 (\$313,711.00 over budget) and the dozer at \$1,047,792.00 (\$81,305.00 over budget). Due to the recent Budget Change Requests for both the Solid Waste Capital Improvement Program costs and Hurricane Ian debris recovery, it is unclear as to the current funding availability to support the increased equipment costs at this time. The Department is still awaiting the arrival of a compactor and dozer competitively bid and ordered in Fiscal Year 2022 (estimated March 2023), so there is no immediate danger of a shortage of operable equipment if this purchase is temporarily delayed. Solid Waste is requesting Board authorization to reject the bids and will evaluate re-advertisement after a mid-year budget adjustment.

Clerk to the Board Instructions:

Cat Landfill Compactors are designed with durability built in, ensuring maximum availability through multiple life cycles. With optimized performance and simplified serviceability, our machines allow you to operate more efficiently and safely.

Introduced in 1993, the 836 has been the industry leader for over 20 years. Focused on helping our customers succeed, we have continued to build upon each new series. The 836K continues our legacy of reliability, performance, safety, operator comfort, serviceability, and efficiency.

Efficiency and Productivity

Delivering efficiency and productivity you demand through integrated machine systems.

Improved Hydraulic Efficiency

Efficiency at your landfill is critical for your business. Improved hydraulic efficiency is achieved with new flow sharing implement and steering variable displacement load sensing piston pumps. Since hydraulic flow is now on demand, you will see improved fuel efficiency.

Impeller Clutch Torque Converter (ICTC)

Lower your cost per ton utilizing advanced ICTC

- Reduce wheel slippage and tire wear by modulating rimpull from 100 to 20 percent while depressing left pedal. After 20 percent rimpull is achieved the left pedal applies the brake.
- Reduce the potential for wheel slippage without reducing hydraulic efficiency.
- Improve fuel efficiency in certain applications with our lock-up clutch torque converter providing direct drive.

Steering and Transmission Integrated Control System (STIC™)

Experience maximum responsiveness and control with STIC that combines directional selection, gear selection and steering into a single lever.

- Simple side-to-side motion turns machine right or left, minimizing operator movements.
- Easy to operate finger controlled gear selection.
- Smoother, faster cycles help reduce operator fatigue through the use of low effort integrated controls.

Steering System

Confident machine operation starts with precise machine control enabled by the 836K's load sensing hydraulic steering system.

- Increase efficiency with our variable displacement piston pumps.
- Achieve precise positioning for easy steering in tight areas with 43 degrees each way of steering articulation.
- Enhance operator comfort with integrated steering and transmission control functions.

Electro Hydraulic Controls

Operators increase productivity with our responsive implements feature.

- Operate comfortably through electronically controlled hydraulic cylinder stops.
- Handle easy-to-use soft detent controls.
- Conveniently set automatic implement kickouts from inside the cab.

Structures

Best built for the toughest conditions.

Robust Structures

Your bottom line is improved by highly durable structures that achieve multiple life cycles and withstand the toughest loading conditions.

- Full box-section rear frame resists torsional shock and twisting forces.
- Heavy-duty steering cylinder mounts efficiently transmit steering loads into the frame.
- Axle mounting has been optimized for increased structural integrity.
- Lower hitch pin, frame plate, and bearing size have been increased for longer life.

We know the harsh environment your machines encounter at the working face of your landfill on a daily basis. This is why the 836K is specifically designed and made with purpose built structures to remain safe and durable for the long run.

Cat Planetary Powershift Transmission

Building your success begins with a best-in-class transmission.

- Consistent, smooth shifting and efficiency through integrated electronic controls that utilize Advanced Productivity Electronic Control Strategy (APECS).
- Long life and reliability through heat treat gear and metallurgy.
- Two forward and two reverse speeds to match your application.

Cat C18 ACERT Engine

The Cat C18 ACERT engine is built and tested to meet your most demanding applications. Two engine options are available that meet Tier 4 Final/Stage IV/Korea Tier 4 Final emission standards or Tier 3/Stage IIIA equivalent emission standards.

- Fully integrated electronic engine controls works in concert with the entire machine to make your fuel go farther.
- Use less fuel idling with Engine Idle Shutdown.
- Maximized durability with Delayed Engine Shutdown.

Power Train

Operate more efficiently with improved power and control.

Cat Torque Converter with Lock-up Clutch

- Eliminates TC losses while lowering system heat.

Waste Protection

Maximize uptime, long life – it's what you expect from your bottom line.

Guarding

Working in the toughest application, the purpose built 836K Landfill Compactor has specialized waste guarding to protect key components and systems from damage, debris, chemicals, premature wear, or wrapping of the material around components. This additional guarding includes:

- **Engine and Power Train Guards** – Hydraulically actuated guards help prevent trash build-up and shield components.
- **Front Frame Guards** – Front frame guards prevent trash build-up inside the frame. This guard further protects components and hydraulic lines.
- **Axle Wrapping and Seal Guarding** – The guarding prevents material from wrapping and binding around the axles, as well as assist in ease of cleaning.
- **Major System Guarding and Sight Gauges** – The hydraulic tank, the hydraulic system oil tube, and transmission oil tube are guarded to resist damage from debris. The sight gauges for the hydraulic and transmission are easily visible from ground level. The fuel tank is positioned away from the debris in the front frame and is easily accessed.
- **Air Inlet Screen** – The vertically corrugated, fine mesh, air inlet screen helps reduce trash from entering the radiator area and allows for debris to fall off.
- **Striker Bars and Optional Cleaner Fingers** – Striker bars are located in front of and behind the rear wheels and behind the front wheels. Striker bars help to keep wheels free of debris to assist the wheel step tips in maintaining good traction. In cohesive material or severe packing conditions, optional cleaner fingers are available to further assist in keeping the wheel step tips clean.
- **Extended Roof** – An oversized roof extends past the cab doors and windows to minimize debris build up.

1) Engine and Power Train Guards 2) Axle Guards
3) Air Inlet Screen 4) Striker Bars/Cleaner Fingers

A draft copy of a contract that will need to be executed between Brevard County and the awarded bidder is attached for your review. The draft contract that is attached is not required at the time of your bid submittal.

7. The dozer shall be new, unused and of current model and meet the attached specifications. The dozer shall be equipped in accordance with the manufacturer's latest literature, a copy of which must accompany the contractor's bid showing that the equipment meets or exceeds each and every requirement of the specifications of these solicitation documents.

NOTE: Any omissions or errors in these specifications do not relieve the successful contractor from furnishing a complete dozer, ready for immediate use.

8. Where the unit deviates from specifications, clearly indicate the nature of the deviation on the Exception Form. The County reserves the right to waive minor deviations from the specifications, which in the County's sole and absolute judgment do not materially affect the dozer's performance or maintenance.

Cat® D7

Track-Type Tractor

The new Cat® D7 joins the growing family of Next Generation Dozers, delivering more productivity and high drive undercarriage value. A fully automatic 4-speed transmission makes efficient operation easy. The broadest range of technology features in the industry work together seamlessly to help you make the most of your equipment investment.

Fully Automatic, Next Generation Performance

- Harness 6% more weight and 12% more horsepower than D7E to take on a wide range of dozing and grading tasks.
- Move up to 8% more material per hour.
- Like D6 and D8, fully automatic 4-speed powershift transmission continuously adjusts for maximum efficiency and power to the ground without added operator input.
- SU and S blades are 10% larger to help you get jobs done in fewer passes.
- Elevated sprocket gives you better ride and balance, plus more penetration force.
- Long undercarriage is standard, with more track at the rear of the machine for superior dozing performance.
- Outfit your dozer from the factory to take on the challenges of waste handling, land clearing, dredging and more.

Unprecedented Technology Choices

- Cat® GRADE with Slope Assist™ automatically maintains pre-established blade position without a GPS signal – no additional hardware or software needed.
- Factory integrated Cat GRADE with 3D uses GPS to control the blade so you can get to design plan faster.
- Cat GRADE with 3D has no masts – small antennas are integrated into the cab roof and GPS receivers are mounted inside the cab for better protection.
- GRADE operator interface is intuitive and easier to use: 254 mm (10 in) touchscreen, Android OS platform, operates like a smart phone.
- Slope Indicate shows machine cross-slope and fore/aft orientation right on the main display to help operators with slope work.
- Attachment Ready Option (ARO) comes from the factory with key sensors and wiring installed so you can easily upgrade to fully integrated grade control or blade mounted system.
- Install the aftermarket grade control system of your choice easily with optimal mounting locations in the cab.

Boost Operator Efficiency

- New assist features just work behind the scenes to help make machine operation easier.
- Make the most of every pass with Blade Load Monitor to help you optimize blade capacity.¹
- Stable Blade works seamlessly with operator inputs to help produce a smoother surface.
- Traction Control automatically reduces track slip to save you time, fuel and track wear.¹
- AutoCarry automates blade lift to help you maintain consistent blade load and help reduce track slip.¹

Comfort and Visibility

- Common cab with D5 and D6, for a whole new standard in comfort and productivity.
- Easy-to-use 254 mm (10 in) touchscreen main display.
- Standard High Definition rearview camera shows prominently in the main display.
- Key Features Help, built into the display, gives you an overview of machine and technology features and helpful operating tips.
- Wide air suspension seat has multiple adjustments for personalized comfort. Armrest adjusts independent of the seat.
- Distributed cab heating/cooling circulates air effectively around the operator and helps reduce window fogging/frosting.
- Ample storage spaces throughout the cab.
- Convenient USB and Auxiliary power ports in cab.

- Remote Troubleshoot saves time and money by allowing your Cat dealer to perform diagnostic testing remotely.
- Remote Flash updates on-board software without a technician being present, at a time that is convenient for you, potentially reducing update time by as much as 50%.

Remote Control Ready

- Cab is Remote Control Ready from the factory with external connector for dealer installation of a plug-and-play roof-mounted remote control unit.
- Cat COMMAND for Dozing offers remote control operation for enhanced safety and greater productivity.
- COMMAND uses line-of-sight (LOS) control with an over-the-shoulder console, or a non-line-of-sight (NLOS) option using the Cat Command Station to run the machine remotely.

Saved Settings, Added Security

- Application Profile lets you save machine settings based on application or operator preference – save multiple profiles for various jobs or multiple operators.
- Operator ID allows you to save machine settings and to track individual operator productivity, safety and training opportunities via Product Link.²
- Machine Security – Passcode helps prevent theft and unauthorized operation by requiring an operator to enter an ID to start the machine.²
