- (a) An Economic Development Ad Valorem Tax Exemption is hereby granted to Rogue Valley Microdevices, Inc. (hereafter referred to as "the Company"), for:
1. Seventy percent a) of the assessed value of all improvements to real property made by or for the use of a new business (not to exceed the amount identified in the Company's application for exemption) as determined by the Property Appraiser for the first year after substantial completion of those improvements; and b) Seventy percent of the assessed value of all tangible personal property of such new business in place during that first year (not to exceed the amount identified in the Company's application for exemption), or

Upon the County's receipt of any such notice, the county manager or designee shall forward the notice to the Property Appraiser along with a copy of this subsection of the ordinance.
- (g) Upon discovery of the Company's failure to qualify for the ad valorem tax exemption granted by this ordinance, the Board of County Commissioners may revoke this Ordinance, and the company shall reimburse those County ad valorem taxes abated in favor of the Company for that period of time that it was determined that the Company no longer met the criteria of Section 196.012(14), Florida Statutes.

### **Rogue Valley Microdevices, Inc. Ad Valorem Tax Abatement Executive Summary**

Founded in 2003, Rogue Valley Microdevices is an Oregon based microchip manufacturing company specializing in MEMS, Sensor, and Biomedical Device fabrication. The company serves as a manufacturing partner to over 150 technology companies supporting the development and commercialization of a wide range of critical technology including:

- Metallization for wafer level packaging
- Small footprint reduced cost LIDAR for autonomous vehicles
- Continuous glucose monitoring device
- Detection of airborne toxins using nanotechnology for wearables
- Realtime chip-based radiation dosimetry
- High accuracy next generation cancer screening
- Graphene-based biosensor for drug discovery
- High accuracy gas flow sensor
- Photoacoustic Imaging Technology for medical applications

Due to growing customer demand, Rogue Valley Microdevices has decided to expand its production capacity by building a second manufacturing facility. The ideal facility will have 50,000sqft of space to support significant growth in capacity and allow the company to more than double in size. The company expects to make an initial investment of \$25 million in new equipment and leasehold improvements. Beyond this initial investment, we expect to continue building capacity and capability, reaching a minimum of 30 employees at the new facility.

After a national site search, the company is considering sites in Arizona, Texas, and Palm Bay, Florida. The Ad Valorem Tax Abatement program would be of great benefit to our growth and expansion efforts by allowing the company to better leverage its capital to increase efficiency and raise competitiveness. It will enable us to move forward with an expansion in Florida. We appreciate the consideration of our request and hope to have the Commission's assistance with our expansion efforts through the approval of Rogue Valley Microdevices for the Ad Valorem Tax Abatement Program.
